AMAAN SHAIKH

tameem0805@gmail.com | 9028752526 | Maharashtra, India

Professional Summary

Highly skilled Software Engineer and Full Stack Developer with 3+ years of combined experience in designing, developing, and deploying scalable web and mobile applications. Proficient in Java, Python, Spring Boot, FastAPI, React.js, Next.js, and RESTful APIs. Expertise spans backend development, API integration, robust database design (PostgreSQL, MySQL), responsive frontend interfaces, and efficient cloud deployment practices leveraging AWS and CI/CD pipelines. Proven ability to innovate, including developing AI-powered applications utilizing Large Language Models (LLMs), Natural Language Processing (NLP), Prompt Engineering, and Retrieval Augmented Generation (RAG) to deliver intelligent, high-performance solutions.

Experience

Java Full Stack Developer Intern - Zidio Development, Remote

June 2026 - Aug 2026
Architected and developed scalable full-stack web applications utilizing Java, Spring Boot, React.js, and PostgreSQL. Engineered robust RESTful APIs, designed efficient database schemas, and implemented dynamic frontend interfaces. Contributed across the complete software development lifecycle, encompassing requirements gathering, implementation, rigorous testing, debugging, and successful deployment.

Software Engineer Intern - CerenMobile, Remote

Oct 2025 - Apr 2026
Developed and maintained high-performance mobile applications for Android and cross-platform using Java, Android SDK, and React Native. Seamlessly integrated RESTful APIs, crafted intuitive and responsive user interfaces, and optimized application performance for enhanced user experience. Actively collaborated within Agile development environments, utilizing Git/GitHub for version control, and effectively troubleshot and resolved complex application errors.

Freelance Full Stack Developer - Self-Employed, Remote

2024 - Present
Delivered production-ready full-stack web applications for diverse clients, leveraging modern frontend and backend technologies including React.js, Next.js, Spring Boot, FastAPI, and PostgreSQL. Engineered responsive user interfaces, robust authentication systems (JWT), secure database integrations, and scalable RESTful APIs. Spearheaded end-to-end project management, from initial requirements analysis and database architecture design to cloud deployment and ongoing maintenance, ensuring high client satisfaction and optimal application performance.

Education

Swami Ramanand Teerth Marathwada University, Nanded, Maharashtra - Bachelor of Science in Computer Science

2023 - 2026

Skills

Java, JavaScript, TypeScript, Python, SQL, React.js, React Native, Next.js, Tailwind CSS, HTML5, CSS3, RESTful APIs, Spring Boot, FastAPI, Express.js, JWT Authentication, PostgreSQL, MySQL, SQLite, Firebase, AWS, Cloud Deployment, CI/CD, Jenkins, Git, GitHub, Android SDK, Android Studio, IntelliJ IDEA, Postman, LLMs (Large Language Models), NLP (Natural Language Processing), Prompt Engineering, RAG (Retrieval Augmented Generation), AI Agents, Google Gemini AI, PyTorch, Three.js, Prisma, N8N, Agile Methodologies, Software Development Life Cycle (SDLC), Microservices Architecture, Database Design, System Design, Problem Solving, Debugging

Projects

KEYSTONE – Field Service Management Platform

Architected and developed KEYSTONE, a comprehensive full-stack field service management platform. Implemented secure role-based JWT authentication, advanced work-order management, real-time technician tracking, and interactive dashboards for operational oversight. Designed robust RESTful APIs and optimized PostgreSQL database architecture to efficiently manage service operations and streamline complex workflows.
URL: https://keystone-eight-virid.app
Technologies: Java, Spring Boot, React.js, TypeScript, PostgreSQL, JWT, RESTful APIs

Calisthenics Pro — AI-Powered Fitness Platform

Developed 'Calisthenics Pro', an innovative AI-powered full-stack fitness platform. Features personalized calisthenics workout plans generated dynamically based on user goals and fitness levels. Successfully integrated Google Gemini AI with a FastAPI backend to deliver intelligent workout generation and tailored training recommendations. Engineered a highly responsive and modern frontend using Next.js, TypeScript, and Tailwind CSS, supported by a scalable microservices-oriented frontend-backend architecture.
URL: https://calesthenics-pro.vercel.app
Technologies: Next.js 14, TypeScript, Tailwind CSS, FastAPI, Google Gemini AI

ASTRAA – Climate Intelligence System

Engineered ASTRAA, a sophisticated climate intelligence system integrating complex frontend, robust backend, and advanced machine learning services. Developed interactive dashboards and real-time weather visualizations, leveraging modern web technologies (Next.js, Express.js, FastAPI, PyTorch, Three.js) for high-performance data presentation.
URL: https://astraa.app
Technologies: Next.js, Express.js, FastAPI, PyTorch, Three.js

AAMDAR Fitness Club - Fitness Management System

Developed a comprehensive full-stack fitness management platform for AAMDAR Fitness Club. Features include robust membership management, a dedicated manager portal for administrative tasks, and detailed trainer profiles. Utilized Next.js, TypeScript, PostgreSQL, Prisma, and Tailwind CSS to build a scalable and user-friendly system, enhancing operational efficiency.
